COMFORT YOU
CAN COUNT ON

COMFORTABLE
RECOVERY

YOU JUST GOT
THE NEWS....

Your retinal specialist has told you that you need a type of surgery called a Vitrectomy.

You were also told that this type of surgery requires a 24/7 face down recovery period that can last from 7 days to 2 weeks or more....And, if you don't stay in that face down position, your surgery could fail.

It's not as bad as you think....

SUPPORTING

Our seated support system provides easy adjustability with many options that help you with your daily routine. Complete ergonomic support allows you to be comfortably upright while eating, watching TV, or visiting with family and friends.

With comfortable, ergonomic support for your whole body, you'll prevent neck and back strain or possible injury due to strict positioning requirements. You will also increase your chances of surgical success and restored vision, reducing the likelihood of repeated surgery.

Comfort Solutions will help you to relax in comfort, get more sleep and quickly resume more of your normal daily activities.

Rely on Comfort Solutions state-of-the-art Vitrectomy Recovery System

COMFORTABLE

Bed top with table configuration

Sleep with ease

Visit with family and friends

SOLUTIONS

Face support unit on table

Our face support system offers two options that provide plenty of breathing room and personalized adjustability. Both options provide comfort and support and when sleeping you will be immediately aware of accidental non-compliance enabling you to promptly correct it.
